Summary

Front-end developer and ICT student at Fontys University of Applied Sciences in Eindhoven. I design interfaces in Figma and build them as web and mobile apps with React, TypeScript and React Native. In school projects I have worked for real clients (OpenRemote, Visio) and tested my designs with users. Looking for an internship, or a junior front-end developer or designer role.

Technical Skills

Front-End	React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, Responsive Design
Mobile	React Native, Expo (Android, iOS, web), Expo Router, Bluetooth Low Energy (BLE), three.js / React Three Fiber
Back-End & Data	Node.js, Express, C#, ASP.NET Core (MVC, Razor Pages, Blazor), Python (Flask), REST APIs, PostgreSQL, SQL Server
UI/UX Design	Figma (wireframes, prototyping, design systems), Adobe XD (basic), user research, user testing
Tools	Git, GitHub, GitLab, npm, VS Code, Visual Studio, Vercel, Agile/Scrum
AI Tools	Claude, Claude Code (Agent Skills, plugins, connectors), MCP servers, AI agents, Gemini API, prompt engineering
Other	C++ (ESP32, Arduino), Unity, Godot

Experience & Projects

App Developer & Designer - Visiobal **Feb 2026 - Jun 2026**

Client: Visio (support for blind and visually impaired children) | Fontys University team project

- A ball that plays music, so blind and visually impaired children can find it by sound and play with it.
- Designed and built the accessible companion app in React Native (Expo): connect over Bluetooth, pick a song, set the volume.
- Added a 3D model of the ball, light and dark themes and five languages; helped write the ball's C++ firmware on an ESP32.

Front-End Lead & UI/UX Designer - OurGrid **Sep 2025 - Feb 2026**

Client: OpenRemote, worked directly with the CEO | Fontys University team project

- A web app that explains grid congestion and asks residents to move heavy energy use out of the 16:00-18:00 peak.
- Designed separate flows for residents and municipalities in Figma and tested them with users before building.
- Led the React front-end: a resident dashboard with the daily load and peak window, and a municipality congestion map.

DevMatch - AI job assistant for developers **Feb 2026 - Present**

Personal project | github.com/Vladi397/devmatch

- A cross-platform app that finds developer jobs, shows how well your resume fits each one, and helps you apply.
- Writes a cover letter for each job, suggests resume improvements, and runs mock interviews that give feedback on every answer.
- Built with React Native (Expo), Node.js / Express and PostgreSQL; integrates the Adzuna and Remotive job APIs and Gemini AI.

Portfolio Website **Ongoing**

Personal project | vladi-portfolio.vercel.app

- My personal site with my projects, skills and certificates, in English, Dutch and Bulgarian.
- Each project opens into an interactive case study, e.g. a 3D model of the Visiobal ball and its songs playing in the browser.
- Built from reusable React components with Tailwind CSS, three.js and Framer Motion animations, plus a contact form.

Education

Fontys University of Applied Sciences, Eindhoven **Sep 2024 - Jun 2029 (expected)**

Bachelor of ICT (Open Learning): Software Engineering, Smart Media and UI/UX; currently in semester 4 of 8

Professional High School of Economics, Pernik, Bulgaria **2019 - 2024**

High School Diploma, Electronic Trade

Certifications

Meta Front-End Developer (Coursera), 2023 - 2024: Advanced React, React Basics, HTML and CSS in Depth, Version Control, Programming with JavaScript, Introduction to Front-End Development.

Additional Information

Languages: English (C1, IELTS), Bulgarian (native), Dutch (A1, learning) | **Availability:** 32+ hours/week | **Driving licence:** B
Interests: Competitive kickboxing (4 years, multiple medals), gym, swimming, football
